THE SMART FORTWO COUPE AND THE SMART FORTWO CABRIO

The two best ways to get into town

You'll only find unusual solutions by asking unusual questions. "Open your mind" is all about questioning the status quo and seeing it as offering challenges, rather than imposing boundaries. The smart brand follows this philosophy, with each model embodying a departure from convention. The smart fortwo coupé and the smart fortwo cabrio follow a new direction from established small car concepts.

THE SMART FORTWO COUPE AND THE SMART FORTWO CABRIO
The two best ways to get into town

With high levels of comfort, functionality and safety, the smart fortwo coupé and cabrio are great fun to drive. Thanks to a host of unique features and finely developed technology, these cars offer a standard of refinement far superior than expected in a small car. You feel it as soon as you pull away: the smart fortwo range is brimming with zip. The high-tech turbocharged engines are lively and the transmission offers optimized gear-change sequences. When you're not in such a hurry on longer trips, you can set the optional cruise control to your desired speed. You can take hill starts in your stride too, thanks to hill start assist, which prevents you from rolling backwards when you transfer your foot from the brake to the accelerator.

Whether you choose the coupé or the cabrio, the pure, the passion or the Brabus, you'll soon wonder how you lived without it. With the smart fortwo you can run around town all day without feeling exhausted by the end of it. Plus, if you're driving a smart fortwo cabrio, you can even make the most of the sun too. Despite their distinctive design, the smart fortwo coupé or the smart fortwo cabrio are as diverse in character as the people who drive them. Have fun discovering the right fortwo for you.

The smart fortwo coupé

The wide-opening doors of the smart fortwo coupé invite you to climb in. The high, comfortable seats give you excellent all-round vision. You'll be surprised by the spacious interior – there's more than enough room for your weekly shopping in the luggage compartment – and this extends even further when the passenger seat is folded forward. By now you'll have realized that you're driving the perfect city car. With a turning circle of just 8.7 meters the smart fortwo coupé is maneuverable and agile. It is economical, has extremely low running costs and very low depreciation. Not only are they great to drive, they also offer outstanding design and safety too, with the tridion safety cell in black and silver. The coloured body parts – we call them bodypanels – are made of high-quality plastic. This means that they are flexible, resist minor knocks, don't rust and look good for a long time.

The smart fortwo cabrio

Maybe it's the way your hair blows in the wind, or simply because the world always looks better in the sunshine: smart fortwo cabrio drivers always turn heads. The touch of a button is all it takes to open the tritop convertible roof. Decide for yourself how much sun you'd like: from partly opened to total cabrio. Simply remove the roof bars and store them neatly inside the tailgate. Whether it's sunshine or showers, you'll always feel bright. That's because you're driving the least expensive cabrio in the world. You'll enjoy the highest level of comfort as well as extra safety. The smart fortwo cabrio combines all the safety features on the city-coupé, and with its high strength steel roll-over bar, it's just as solid a proposition.

SMART OPTIONS AND ACCESSORIES not exactly essential, but nice all the same

Bodypanels

The smart fortwo's two-colour design makes it immediately obvious that it's no ordinary car. It's all down to the unique combination of the tridion safety cell and the high quality plastic bodypanels. These allow you to mix and match the colours of your smart fortwo all you want. You can even opt for a complete change of colour scheme. And in the event of damage, individual bodypanels can simply be replaced. This is quicker and much less expensive than with conventional cars, which entails replacing and repainting an entire section.

smart Options

The smart fortwo coupé and smart fortwo cabrio already include a high level of equipment as standard, but there is still scope to tailor your smart fortwo by adding special features and accessories from our range of factory fitted optional equipment. The option packages offer greater value for money by combining a selection of complementary options together.

1 - Matte Black Finish Air Vent

Give your smart car a bit of the Ultimate look. Select a set of Genuine BRABUS Air Vent Flaps in an unpainted Matte Black Finish.

2 - smart radio five, CD player, RDS, high power, CD changer controller

With CD player and FM radio with RDS. When a CD is inserted, the optionally available 6 compartment CD-changer can be controlled. High power output, with acoustics and design adapted to the smart. Optional connections for the sound set, CD-changer and provision for hands-free telephone. Antitheft device with numerical code. Sounds good, doesn't it?

3 - Sports exhaust with heat shield

The sports exhaust with centrally positioned double pipe looks so good, it will take your breath away. Banish the winter blues with heated driver and passenger seats. Two temperature settings for added convenience Sound package enhances the sound quality of your stereo.

4 - CD organizer

Simply attach to the vertical console and up to 4 compact discs can share the ride.

SMART OPTIONS AND ACCESSORIES
not exactly essential, but nice all the same

smart Accessories

From the bicycle rack to the sound system, smart accessories represent the ultimate in fun and convenience. You never know what's around the corner, smart accessories cover all contingencies – from new additions to the family to fresh snow on the roads. It's up to you what you wish to take on board. Would you like more comfort for your feet, more stowage space, a new colour for your smart – or everything at once? You'll find the complete smart accessories program in the current accessories catalogue.

1 - Front spoiler

With the front spoiler your smart will have sportiness written all over it.

2 - iPod car kit

With thousands of songs in its repertoire. Simply connect via plug&play. The volume and sound can be controlled conveniently via the smart audio system.

3 - Seat organiser bag

The organizational whiz that's at home both in the office and on the back seat. The bag is sturdy, flexible and reliable, and can be fixed to the seat.

4 - Sun blind for glass roof

An adjustable sun blind for those days when the sun gets just a little too hot.

ECOLOGY

Actually they're all green

At smart, we are continually questioning established practices and coming up with innovative solutions. smart environmental policy is geared to ensuring that DaimlerChrysler's guidelines on the protection of the environment and the conservation of energy and natural resources are applied in uncompromising manner. These guidelines play a crucial role in all our considerations. From vehicle development through production in smartville to the recycling of many components, smart is more than a car. smart is about a specific outlook on life. Whether in scratch black or lite white – essentially, every smart is green. All outsourced parts and components are developed and built in accordance with uniform ecological criteria. Instead of waiting for the problem of taking back and dismantling vehicles for subsequent recycling to come to us, we tackle it during the development phase.

Design for environment

Sky blue and sunset red. smart™ comes in the brightest colours. Is it all just show? Not at all. Even in the development phase smart™ gmbh sets great store by the use of eco-friendly parts. The ecological requirements are laid down in a whole string of specifications. And for smart™ gmbh it is essential that their system partners take these requirements just as seriously.

Developing individual parts that meet ecological criteria is a long-term challenge. Where scope for optimization is identified, the knowledge gained flows directly into the development effort.

Harmful substances like lead, chromium, mercury and cadmium are barred from the production process from the outset, while PVC is avoided almost completely.

The whole development process is tracked by an ecological control system specially created to monitor compliance with the strict regulations. All directly and indirectly involved development teams are an integral part of this system which has been certified to ISO 14001 on the Böblingen site by external inspectors since 1997.
